CampusBiz

From idea to first sale.

A multi-agent platform that helps student founders plan, market and run a small business.

THE PROBLEM

First-time founders hesitate before they start

01

Planning

“How much must I sell to break even?”

Pricing, budgeting and cash-flow math they have never done before.

02

Marketing

“Who even buys this?”

Positioning, copy and a promo calendar built from a blank page.

03

Operations

“Can I actually deliver?”

Production, inventory and packaging squeezed around school and work.

1 in 5 new businesses close within their first year — most cite planning, cash flow and marketing.

THE GAP

Why a chatbot isn't enough

Generic AI tools

- ✕ Hallucinated prices and math
- ✕ Generic, one-size-fits-all advice
- ✕ Forgets your budget and constraints
- ✕ Stops at text — no real execution
- ✕ No memory, no orders, no follow-through

CampusBiz

- ✓ Deterministic engine does every calculation
- ✓ Role-specialized agents, your context
- ✓ Persistent assumptions and order database
- ✓ Ships real assets: copy, calendar, plan
- ✓ End-to-end: from idea to first sale

THE SOLUTION

Meet CampusBiz — your AI founding team

1

Tell us your idea

Budget, product and goals — in plain language, no spreadsheets required.

→

2

Your AI team analyzes

Finance, demand, growth and operations specialists work in parallel.

→

3

Launch with a blueprint

A complete, math-checked business blueprint you can act on today.

Your deliverable

One complete Business Blueprint — plus a Dashboard, Launch Studio and Order Manager to run it.

SECTION

03

The Agent Team

Five specialists divide the work — one orchestrator keeps them aligned.

THE AGENT TEAM

Five specialists. One blueprint.

COVERAGE

Every problem has an owner

Problem	Owner	Supporting	Deliverable
Pricing, cost & break-even	**Finance**	Orchestrator	Exact break-even math
Demand & target market	**Demand**	Orchestrator	Evidence-backed demand
Positioning & marketing	**Growth**	Demand	Copy, assets, calendar
Production & daily ops	**Operations**	Finance	Feasible weekly plan
Conflicting trade-offs	**Orchestrator**	All agents	One coherent blueprint

The orchestrator owns coordination; every specialist owns a domain and produces a concrete deliverable.
